

ENVIRONMENTAL POLICY

AEPL is committed to follow the good environment practices to the implementation of EMS policy and the environment management programs in relations to activities conducted in the organization.

To achieve this, AEPL will;

- Conduct its activities in an environmentally responsible manner by complying with all relevant legal & other requirements.
- Minimize impacts to the land, air & water & conservation of biodiversity in plantation through systematic environmental programs.
- Strive for continual improvement by reviewing environmental objectives & targets at regular intervals.
- Ensure suppliers, sub contractors & other interest parties understand the policy & their environmental responsibilities.
- Provide the employees with the training & required resources to perform their tasks safely & fulfill their environmental responsibilities where it's cost effective.
- Prevent pollution where possible & develop response plan for potential emergency situations.
- Implement & maintain good practices of waste management & promote principles of reduce, reuse & recycle to ensure the effective use of available resources.
- Encourage employees to work to improve the environment, keeping in mind the impact of their business activities & social responsibilities.
